“Unique For Everyone”

OUR STORY

Knowing where we come from is crucial for knowing where we're going.

Our planet has more than 8 billion people to feed. Here at Ubuntu Seeds, we adopt a responsible attitude to our business. Each decision we take, each seed we create and each solution we design represents a deep commitment. We want to take action for progress and have a real impact on everyone's future.

Ubuntu seeds is commit to supply genetically enhanced high quality seeds after rigorous breeding, intensive product testing across various Agro-climatic zones and incorporating views and ideas of farmers, dealers and consumers.

Knowing how to share our knowledge is vital for opening up to the world.

Every day, together, we pursue our mission with undiminished enthusiasm, namely to cooperate for the progress of agriculture, everywhere, for everyone. Those who sow the seeds of effort and the desire to learn are those who harvest the desire to progress and share.

Knowing how to listen is a crucial step for learning.

We believe that no outcome is ever certain. Moving forward requires ongoing efforts. We need to endlessly adapt and listen when the farmer speaks to us. This is our leitmotiv, which is a powerful driving force that daily stimulates the men and women that work in our group.

OUR STRENGTH

VISION

- **"Aspirations For Future"**
- To be recognized as the leading global Indian Seed Company driven by science, technology and innovation delivering higher values to the farmers & customers.

VALUES

• **Serving farmers**

- We are the farmer's champion. We listen closely to them and understand their need. We offer our best solutions and deliver quality in everything we do to improve their yield and income.

• **Learning and innovation**

- We cultivate ideas and harvest innovation. Research excites us. We build an environment for creativity, in the laboratory, in the field and in the office.

• **Visionary team**

- We constantly challenge ourselves and our team to excel. We work together, trust each other, care for and respect each other's unique and deserve talent.

MISION

- To give great joy or pleasure to farming community
- To provide innovative seeds and services that help improve the livelihood of farmers and promote sustainable farming and business practices.
- To add to the prosperity of our farmers by delivering excellent research products.
- To create a better everyday life for the farmers.

WHY UBUNTU SEEDS ??

- Diverse high quality product range
- Visionary research team & strong infrastructure
- Cultivate ideas and harvest innovation
- Continuously innovate to address challenges of farmers
- Need based innovative & improved product identification
- Never compromise in quality of seed and services.
- Extending knowledge to unlock the potentials of farmers.
- Prompt after sales services & constant contact with farmers.
- Professional team who can train and support our sales team and farmers from time to time.

**RESEARCH**

Sound research backup is pre-requisite for the success of any industry. The team consists of highly dedicated breeders who constantly strive for the quality of our products in the field, in transit, as well as in the market. Most prominently, we work on vegetable crops like Okra, cluster bean, Guards, Tomato and chilly and field crops like Cotton, Bajra, Maize and Sweet Corn.

QUALITY

Supplying superior quality products and continuously working on improving product quality is at the heart of our ideology. We combine conventional knowledge and new technologies to deliver seeds that help in maximizing agricultural productivity. Our strong network and trusted relationship with farmers help us in quality seed production

EXPERTISE

We ubuntu seeds is fortunate to have well qualified, highly professional team with years of seed experience and expertise in research, production and processing of seeds. Our scientists are abreast with latest technology and our farmers are trained to carefully and technically handle seeds.

INFRASTRUCTURE

Our seeds are produced in fertile production plots stretching over a sprawl of thousands of acres. We have a state of the art seeds processing facility equipped with advanced machinery and a research lab to boost our drive for innovation.

ASSIST

Our professional team who periodically train and assist our sales team and farmers which will help them to produce more yield. It is an inherent part of our vision to pioneer and implement programs dedicated to the growth and development of farmers.

INNOVATION

The world is rapidly changing, which means innovative farming approaches are more urgent than ever before. With human population growing at an alarming rate, need of the hour is to find ways to feed them in a way that doesn't sabotage nature's balance. Hence we are working on production seeds that give off more production consuming less water and in turn energy.

Grow the future

HYBRID OKRA - F1 HYBRID

ROYAL

Plant Height	: 4-5 Ft
1st Picking	: 40-45 DAS
Fruit Length	: 8-10 cm With 5 Ridge
Fruit Colour	: Attractive Dark Colour
Remark	: Profuse Branching Cut Leaves & Short Internode Tolerance to YMV Virus

HOT PAPER - F1 HYBRID

UBUNTU 365

Days to 1st Picking	: 60-65 DAS
Plant Type	: Spreading Type
Fruit Colour :	: Attractive Green
Fruit Length	: 12-14 cms
Fruit Diameter	: 2.5 cms
Disease Resistance	: Highly Tolerant to Viral Disease
Remark	: Low Pungent Best for Green & Aachar Purpose

MASTER

Days to 1st Picking	: 55-60 DAS
Plant Type	: Medium Tall Spreading
Fruit Colour :	: Slightly Wrinkled Greenish
Fruit Length	: 15-18 cms
Fruit Diameter	: 1.8 cms
Disease Resistance	: Highly Tolerant to Viral Disease
Remark	: Medium Pungent Best for Red Dry

UBUNTU 780

Days to 1st Picking	: 55-60 DAS
Plant Type	: Erect
Fruit Colour	: Dark Green
Fruit Length	: 7-8 cms
Fruit Diameter	: 0.7-0.8 cms
Disease Resistance	: Highly Resistance to Viral Disease
Remark	: High Pungent

ATAL

Days to 1st Picking	: 50-55 DAS
Plant Type	: Semi Erect
Fruit Colour :	: Attractive Glossy Green
Fruit Length	: 13-15 cms
Fruit Diameter	: 1-1.3 cms
Disease Resistance	: Highly Tolerant to Viral Disease
Remark	: Medium to High Pungent Best for Green & Red Dry

CABBAGE - F1 HYBRID

UBUNTU 555

Days to Maturity	: 55 DAS
Avg. Head Weight	: 0.8-1.1 Kg
Field Holding Capacity	: 15-20 Days
Disease Resistance	: Black Rot Resistance
Head Colour	: Attractive Green
Season	: Winter Special Hybrid
Remark	: Compact Head With Short Core Length Good Heat Tolerant

MUSK MELON - F1 HYBRID

VAJRA

Days to Maturity	: 70-75 DAS
Fruit & Skin Colour	: Buff Yellow Rind With Attractive Fine Nets
Flesh Colour	: Thick Orange Colour
Fruit Shape	: Globe Type
Fruit Weight	: 1.7-2.5 Kg
Sweetness/Aroma	: 12-14% TSS, Tender Juicy & Rich in Aroma
Disease Resistance	: Tolerant to Fusarium Wilt
Remark	: Best for Long Transport Widely Adaptability

NECTAR

Days to Maturity	: 55-60 DAS
Fruit & Skin Colour	: Attractive Fine Nets with Mild Strip
Flesh Colour :	: Orange Colour
Fruit Shape	: Round With Medium Cavity
Fruit Weight	: 1.0-1.25 Kg
Sweetness/Aroma	: 12-14% TSS, Very Sweet in Aroma
Disease Resistance	: Tolerant to Fusarium Wilt
Remark	: Sturdy, Healthy & Dense Plant with Excellent Bearing Habit.

WATER MELON - F1 HYBRID

RED GAINT

Days to Maturity	: 65-70 DAS
Fruit Colour	: Black
Flesh Colour	: Dark Red
Sweetness	: 12-13% TSS
Avg. Fruit Weight	: 4-5 Kg
Fruit Shape	: Oblong
Remark	: Best for Long Transport

UBUNTU - 850

Days to Maturity	: 85-90 DAS
Fruit Colour	: Light Green with Dark Green Strip
Flesh Colour	: Dark Red
Sweetness	: 12-12.5% TSS
Avg. Fruit Weight	: 10-12 Kg
Fruit Shape	: Oblong
Remark	: Best for Long Transport

BITTER GOURD - F1 HYBRID

UBUNTU 1214

Days to 1st Picking	: 50-55 DAS
Fruit Colour	: Attractive Shining Green
Fruit Shape	: Short Spiny
Fruit Length	: 12 -14 cms
Remark	: Vigorous Growing Hybrid

UBUNTU 1618

Days to 1st Picking	: 60 DAS
Fruit Colour	: Mild Attractive Dark Green
Fruit Shape	: Straight Long Medium Spiny
Fruit Length	: 16-18 cms
Remark	: Very High Yielding

UBUNTU 2025

Days to 1st Picking	: 50-55 DAS
Fruit Colour	: Attractive Dark Green
Fruit Shape	: Semi Spined
Fruit Length	: 20-25 cms
Remark	: Strong Vigour & Extremely High Yielding

RIDGE GOURD - F1 HYBRID

UBUNTU 4045

Days to 1st Picking	: 50-55 DAS
Fruit Length	: 40-45 cms
Season	: Round the Year
Remark	: Attractive Strong Ridge : Short Internodes & Highly Productive Vigorous Vine Growth

SPONGE GOURD - F1 HYBRID

UBUNTU 2530

Days to 1st Picking	: 50-55 DAS
Fruit Length	: 25-30 cms
Fruit Colour	: Attractive Green
Season	: Round the Year
Remark	: 20-25 Green Fruits/Plant Vine

BOTTLE GOURD - F1 HYBRID

UBUNTU 4050

Days to Maturity	: 75 DAS
Fruit Shape	: Cylindrical to Bottle Shaped
Fruit Length	: 40-50 cms
Fruit Colour	: Shiny Light Green
Remark	: High Yielding Hybrid

PUMPKIN - F1 HYBRID

UBUNTU 151

Days to Maturity	: 85-90 Days
Fruit Shape	: Flat Round
Fruit Colour	: Green with White Dots
Fruit Weight	: 3-4 kg
Remark	: Yellowish Flesh

CUCUMBER

DOLLY

Days to 1st Picking	: 38-40 DAS
Fruit Colour	: Green with Light Yellow Strip
Fruit Weight	: 250-300 gm
Fruit Length	: 22-25 cms
Fruit Shape	: Elongated Medium Long
Remark	: Soft Skin, Attractive & Very Tasty

UBUNTU 2.0

Days to 1st Picking	: 38-40 DAS
Fruit Colour	: Dark Green
Fruit Weight	: 150-180 gm
Fruit Length	: 15-20 cms
Fruit Shape	: Uniform Cylindrical

MERCY

Days to 1st Picking	: 32-34 DAS
Fruit Colour	: Dark Green with Small Leaves
Fruit Weight	: 100-120 gm
Fruit Length	: 12-15 cms
Fruit Shape	: Uniform Cylindrical Shiny Fruit
Remark	: Open Type Vigorous Plant 3-4 Fruits Cluster Bearing

RADISH

NELSON

Days to Maturity	: 40-45 DAS
Types of Leaves	: Chetki Type
Root Shape	: Cylindrical
Root Length	: 40-45 cms
Root Colour	: Shining White

CARROT

SUNDRI

Days to Maturity	: 70-75 DAS
Fruit Colour	: Attractive Red
Fruit Length	: 25-30 cms
Fruit Shape	: Sleek, Tender & Tapering Root
Remark	: Red core, Very Sweet Taste Suitable for Long Distance

IMPROVED BEET ROOT

RED BLOOM

Days to Maturity	: 50-55 DAS
Fruit Weight	: 100-150 gm
Fruit Colour	: Deep Red
Remark	: Excellent Standing Ability in Field after Maturity

CLUATER BEAN

UBUNTU 245

Days to 1st Picking	: 40-45 DAS
Fruit Colour	: Attractive Green
Fruit Length	: 10-12 cms
Remark	: Erect & Single Stem Plant with Cluster Bearing Habit

TOMATO - F1 HYBRID

GLORY

Plant Type	: Semi Determinate
Days to 1st Picking	: 65 DAT
Fruit Shape	: Flat Round with Green Shoulder
Fruit Weight	: 80-100 gm
Fruit Colour	: Shining Red with Medium Skin Thickness
Season	: kharif & Summer
Disease Resistance	: Tolerant to Bacterial Wilt & Virus Complex
Remark	: High Yielder Hybrid

UBUNTU XXL

Plant Type	: Determinate
Days to 1st Picking	: 65-70 DAT
Fruit Shape	: Blocky
Fruit Weight	: 100-120 gm
Fruit Colour	: Attractive Red
Season	: Round the Year
Disease Resistance	: Tolerant to Bacterial Wilt & TLCV
Remark	: Very Firm Fruit & High Yielding Hybrid

UBUNTU XL

Plant Type	: Determinate
Days to 1st Picking	: 65-70 DAT
Fruit Shape	: Flat Round
Fruit Weight	: 80-100 gm
Fruit Colour	: Attractive Red
Season	: Kharif & Rabi
Disease Resistance	: High Tolerant to TLCV & Heat
Remark	: Excellent Shelf Life

SWEET CORN

UBUNTU 700

Plant Height	: 180-200 cms
Days to Maturity	: 70-75 DAS
Cob Length	: 22-25 cms
Remark	: Attractive Yellow Colour Cob

RESEARCH HYBRID COTTON

AVTAR BG II

Medium Ball Size	: 5.0-5.5 gm
Days to 50 % Flowering:	40-45 DAS
Vigorous Plant With 2-4 Monopodia	
Monopodia Parallel to Main Shoot	
Widely Adopted Hybrid	
Suitable for Irrigated & Non Irrigated Soil	
Hairy Leaves Make it Highly Tolerant to Sucking Pest	
Easy Picking	

RESEARCH HYBRID BAJRA

UBUNTU 111

Days to Maturity	: 70-75 DAS
Plant Height	: 180-200 cms
Long and Compact Earhead	
4-6 Synchronized Tillers	
Excellent Stay Green Quality and Grain Yield	
Suitable for Round the Years	
Tolerant to Downy Mildew, Rust and Smut	
Lodging Tolerance & Best Cooking Quality	

RESEARCH SESAME

UBUNTU 110

Plant Habit : Single Branched
 Plant Height : 90-95 cm
 Suitable for Monsoon & Summer Cultivation
 Capsule Setting from Base of the Plants at Close Interval with Circular 6 Capsule Pearl White Bold Seeds
 Oil Content : 50-51 %
 High Yield Potential Variety

UBUNTU 110 +

Plant Habit : Branched Plant
 Plant Height : 90-95 cm
 Suitable for Monsoon : Semi rabi & Summer Cultivation
 Capsule Setting from Base of The Plants at Close Interval
 Milky White Medium Bold Seeds
 Oil Content : 50-51 %
 High Yield Potential Variety

UBUNTU 210

Plant Habit : Branched Plant
 Plant Height : 100-120 cm
 Days to Maturity : 90-100 DAS
 Suitable for Monsoon & Summer Cultivation
 Dark Black Bold Seeds
 High Yield Potential Variety

RESEARCH GREEN GRAM

UBUNTU 202

Plant Height : 60-65 cms
 Days to Flowering : 35-40 DAS
 Maturity Days : 70-80 DAS
 Plant Habit : Semi Spreading
 Pod Length : Long 8-10 cms & 14-16 Grains Per Pod
 Seed Colour : Shining Green with Glossy Bold Seed
 Season : Kharif & Summer Only
 Remark : Resistance Against Yellow Mosaic Virus Disease

RESEARCH BLACK GRAM

UBUNTU 404

Plant Height : 45-60 cms
 Days to Flowering : 35-40 DAS
 Maturity Days : 65-70 DAS
 Plant Habit : Erect
 Pod Length : Long 5-6 cms & 6-8 Grains Per Pod
 Seed Colour : Drum Shaped Dull Blackish Bold Seeds
 Season : Kharif & Summer only
 Remark : High Yielding Variety

RESEARCH CUMIN

COVER

Days to Maturity : 100-110 DAS
 Spreading Type Dark Green Plant
 4-6 Primary Branches
 Very Bold & Attractive Seeds
 Highly Resistance to Wilt Disease
 Low Seed Rate Required & High Yielder

RESEARCH HYBRID MAIZE

UBUNTU 1012

High Yielding Hybrid
Best for Kharif & Rabi Season
Double Cross Hybrid & Unique Plant Structure
Orange Shiny Seed
Big Cobs & Highest Shelling Percentage (83-85 %)
Semi Dent Grain with Excellent Tip Filling
Well Suited for Fodder

UBUNTU 1011

Days to Maturity : 90-100 DAS in Kharif & 115-120 DAS in Rabi
Semi Dent Yellow Orange Coloured Grain
Tolerant to Drought Condition & Disease
Single Cross Hybrid
Widely Adopted Hybrid
Suitable for Low Management Conditions

UBUNTU 2022

Days to Maturity : 100-105 DAS in Kharif & 120-125 DAS in Rabi
Average Heighted & Broad Leaves
14-16 Row/cob & 40-45 Grains/row
Attractive Long & Equal Heighted Cob
High Yielding White Maize Hybrid
Semi Dent Shining White Coloured Grain
Excellent for Roti Making

Shaping farmer's dream
Serving happiness through seeds
